"RE PILL SHAMPOO"

Anti Dandruff Shampoo

○ **Active ingredients:** SALICILIC ACID, PIROCTON OLAMIN, ZINC PYRITHIONE,

○ **Action:** ANTI DANDRUFF SHAMPOO

○ **Key points:** -Eliminates flakes immediately, preventing new flakes from forming, and soothing scalp discomfort.
-helps combat dandruff and its symptoms while gently cleansing hair and soothing the scalp.
*Calms itching by relieving irritation and reducing redness.

○ **Application:** 1- Soak your hair, first. It's important that the hair is wet to make shampooing easy otherwise it won't work. Use warm or cold water.

2-Shampoo your hair. Hair usually only needs one or two applications of shampoo. More than this can lead to static or flyaway results and leave the hair unprotected.

3-Massage your scalp and let shampoo work for 2 minutes to get healthy hair and scalp.

4-Rinse your hair. It's important to ensure that no shampoo residue remains as this can dry the scalp out and create a flaky itchy scalp, it also leaves a greasy film.

“RE PILL SHAMPOO”

Energising Shampoo

○ **Active ingredients:** GINGKO BILOBA EXTRACT , ARNICA EXTRACT, METHYL-NICOTINATE, CAPSICUM EXTRACT ,

○ **Action:** HAIR LOSS CONTROL

○ **Key points:** *Helps support thicker, healthier hair as it grows.
*Helps support optimal health & vitality of the hair follicle.
*Stimulates micro-circulation to help nourish the hair follicle.
*Formulated to maximize the optimal environment for hair growth.
*Supports cell renewal in the scalp & its regeneration to strength hair fiber at the root.

○ **Application:** 1- Soak your hair, first. It's important that the hair is wet to make shampooing easy otherwise it won't work. Use warm or cold water.
2-Massage your scalp to stimulate blood-flow to get healthy hair and scalp, it also removes dirt.
3-Shampoo your hair. Hair usually only needs one or two applications of shampoo. More than this can lead to static or flyaway results and leave the hair unprotected. If the first shampoo application doesn't lather, rinse, then shampoo a second time.
4-Rinse your hair. It's important to ensure that no shampoo residue remains as this can dry the scalp out and create a flaky itchy scalp, it also leaves a greasy film.
